PROPOSAL

For your school

Prepared for

Date

Prepared by

22 October 2026

Running your school with FacetEdu

Dear Proprietor,

Thank you for your time. This proposal shows how FacetEdu can help your school run its day-to-day work - fees, results, attendance and keeping parents informed - from one place, on any phone or computer, even on a weak network.

FacetEdu is made for Nigerian schools: naira, three-term sessions, CA and exam scores, WAEC-style grades and parents reached by email, WhatsApp and SMS. Every new school gets its first term free, and there is no setup fee.

WHAT YOU GET

- Fees come in faster, with less chasing
- Report cards in hours, not weeks
- Attendance taken in minutes, even without network
- Parents always know what is happening

WHAT IT COSTS

First term	Free
Up to 20 students	Free
Per student	NGN 1,000 a term

HOW TO START

- Sign up in a few minutes
- Import students from Excel
- Invite your staff
- Use the first term free

What FacetEdu does for your school

Fees come in faster, with less chasing

Chasing school fees

- Every family gets a pay link: card, bank transfer or USSD through Paystack or Flutterwave, straight into the school's account.
- Parents can pay in parts; each payment gets a receipt by email automatically.
- Reminders go out by themselves; you see who has paid, who has part-paid and who still owes at a glance.
- Cash and transfers paid at the office are recorded in seconds, with a receipt.

Report cards in hours, not weeks

Report cards take too long

- Teachers type CA and exam scores once; totals, grades, positions and class averages are worked out for them.
- Report cards print as neat PDFs with your logo, or go to parents by email.
- AI help drafts each child's report comment for the teacher to check and edit.
- Results are released to parents on their phones when you are ready.

Attendance taken in minutes, even without network

Taking and following up attendance

- Mark the register on any phone, or scan each child's ID card QR code.
- Works offline and sends when the network returns.
- Parents can be told when a child is absent; children absent several days in a row are flagged for you.

Parents always know what is happening

Keeping parents informed

- A parent portal on their phone (no app to download): results, attendance, fees with Pay now, timetable and notices.
- Email messages are free; WhatsApp and SMS are there when you need them (charged by usage).
- Fewer calls and visits to the office asking "has my payment reached?" or "how is my child doing?"

Staff and salaries under control

Staff attendance and payroll

- Staff clock in and out on their phones or with a QR poster in the staff room; see who is late each morning.
- Monthly payroll with allowances, pension, tax and staff loans worked out; one bank file to pay everyone.
- Payslips sent to each staff member by email.

The books keep themselves

Keeping the school's books

- Fees, salaries and store sales go into the accounts by themselves; add other expenses with a photo of the receipt.
- Upload your bank statement to tick everything off.
- Income and expenses, profit and loss, cash flow and budget reports for the proprietor - as PDF or Excel.

See how the school is doing, term by term

Knowing how the school is really doing

- Reports on results, subjects, attendance, fees and enrolment, compared with earlier terms.
- Which subjects and classes are behind, which students are improving or dropping, and who owes most.
- A printable termly report for the board, and every morning a short list of what needs your attention.

Also included, at no extra cost

• Students, classes, subjects and timetables	• Activities and electives billed per child
• Staff with their own logins and roles	• Multiple branches under one account
• Inventory and the school store	• Installs like an app; works on weak network
• School clinic records	• Your data downloadable any time

What it costs

Students	Each term (after the free first term)
Up to 20	Free
50	NGN 50,000
100	NGN 100,000
300	NGN 300,000
600	NGN 600,000

Everything in this proposal is included: no setup fee and no charge per feature. Billed per term for the students on roll. Optional extras: SMS and WhatsApp messages (charged by usage - email is free), and your own website address with a school website (NGN 30,000 a year). Prices as at 22 October 2026.

How to start

Step	What to do
1	Sign up free at the link below (a few minutes).
2	Add your classes and terms, then import your students from Excel.
3	Invite your staff. Teachers, the bursar, nurse and librarian each get their own login.
4	Use your first term free. Parents start seeing results, attendance and fees on their phones.
